## INDONESIAN NICKEL BOOK 2021/2022

Nickel is a naturally occurring metallic element with a silvery-white, shiny appearance. It is the fifth most common element on earth and is widely used in hundreds of thousands of products for consumer, industrial, military, transport, aerospace, marine and architectural applications.

Indonesia currently has 23.7% of the world's nickel ore reserve and is the largest nickel producer and exporter in the world. The government has declared its priority to maximize nickel processing in the downstream industry in order to increase added value so that it has a positive impact on the country's economy. The country is also pursuing toward building an industry to supply nickel for electric vehicle batteries.

**Petromindo** and **PT Indeks Komoditas Indonesia** are pleased to invite all companies involved in the supports of Indonesian nickel industry (nickel miners, smelter developers, technology providers, mining service companies, including heavy equipment/material suppliers, transportation providers, traders, and users) to be part of the publication of "**Indonesian Nickel Book 2021/2022**".

This book aims to provide comprehensive information on nickel industry in Indonesia, the profile of the industry players (nickel miners and smelters), including maps of their locations, mining/smeltering methods, production activities and product specification and business plans. It also contains information about statistical data on the sector and directories of industry and government contacts.

This first-ever publication will provide a rare opportunity for your company to gain a greater exposure to the international nickel community as the book will certainly become a main reference in the industry and community. It will also enable you to deliver a message and create a base for a strong growth of your business through advertisement.
